

Konica Minolta AccurioPress C6100 with Fiery IC-315 EFI Controller

Outstanding Colour Mid-Volume Production Device

The Konica Minolta AccurioPress C6100 has won BLI's 2018 PRO Award as Outstanding Colour Mid-Volume Production Device for its...

- Excellent, consistent image quality
- Superior productivity
- Media handling flexibility
- Outstanding job management capabilities

“Superior productivity and media handling and high-quality and consistent output distinguish the Konica Minolta AccurioPress C6100 from the pack in the ever competitive and growing mid-volume production colour space,” said David Sweetnam, Keypoint Intelligence - Buyers Lab’s Director of Research and Lab Services for EMEA/Asia. “Over the course of its testing, the device proved it can capably and quickly handle most any media size and type thrown at it up to 400 gsm. And air suction-aided feeding in all paper sources, a second transfer belt, and robust finishing options all bring a level of flexibility to media superior to that of many of its competitors. A well laid out Fiery print driver and excellent job management raise the ease of use to the next level.”

“If you’re looking to maximize uptime, the AccurioPress C6100 delivers on all fronts,” said George Mikolay, Keypoint Intelligence - Buyers Lab’s Associate Director of Copiers/Production. “The device maintains high-level output quality over both short- and long-run jobs with minimal operator interaction required. In fact, halftone imagery was to an exceptional standard even in default mode. Fine lines and text were also to a very high standard. And the new Integrated Colour Care Unit automatically sets up gradation, maximum density adjustments, front to back registration, media profiling, and geyscale balance adjustment, all in real time without impacting productivity. User-replaceable components include the drums, fuser, transfer kit, and feed rollers, all of which are clearly explained with walkthroughs on the control panel and colour-coded guidance. In addition, an inline spectrophotometer allows media profiling to be conducted without the need for manual measurement.”

About Keypoint Intelligence - Buyers Lab

Keypoint Intelligence is a one-stop shop for the digital imaging industry. With our unparalleled tools and unmatched depth of knowledge, we cut through the noise of data to offer clients the unbiased insights and responsive tools they need in those mission-critical moments that define their products and empower their sales.

For over 50 years, Buyers Lab has been the global document imaging industry’s resource for unbiased and reliable information, test data, and competitive selling tools. What started out as a consumer-based publication about office equipment has become an all-encompassing industry resource. Buyers Lab evolves in tandem with the ever-changing landscape of document imaging solutions, constantly updating our methods, expanding our offerings, and tracking cutting-edge developments.

About Buyers Lab PRO Awards

Buyers Lab PRO awards go to the best performers in BLI’s production field tests, during which tens of thousands of pages are printed. Productivity is tested with both coated and uncoated media in a wide range of weights and sizes, using various finishing options to simulate a mix of job scenarios. BLI technicians also evaluate paper-handling capabilities, many facets of ease of use, and image quality.
