Managed Print Services

You print...
We plant...

PrintReleaf Certification empowers you
to sustain and grow our global
forest system…one print job at a time.

PrintReleaf is the world's first platform that automatically converts your paper footprint into actual trees. As you print, you actively replant trees in forests that need it most around the world.

With PrintReleaf, resources borrowed from the earth can be returned and multiplied after use. Through our verified reforestation process, we guarantee 100% net survival of the trees you plant.

Now you can reforest... one print job at a time.

Managed Print Services

PrintReleaf measures your paper footprint based on your cumulative printing. This is done automatically through integrations with market-leading software applications. Then, customers may select where to reforest their consumption through our network of PrintReleaf Certified™ Global Reforestation Projects. Our cloud-based infrastructure and APIs enable seamless integration and limitless scalability.
STEP ONE

YOU PRINT.
WE MEASURE.

There is nothing to install on your server. By leveraging the power of the **cloud**, PrintReleaf is built for scale.

We use your paper consumption totals to calculate your **paper footprint** which is equal to a specific and accurate number of trees.

**STEP THREE**

YOU PLANT TREES.

You are empowered to **releaf** forests based on your paper footprint. The reforestation projects you releaf are up to you!

You can monitor your cumulative environmental impact on your **PrintReleaf Dashboard**.

You continue printing according to your needs.

Your paper consumption is measured.

WE CALCULATE & CONVERT.

STEP TWO

PrintReleaf provides **certificates and reports** about the forests you have releafed over time.

There are PrintReleaf Certified Global Reforestation Projects in:

- Brazil
- Dominican Republic
- India
- Ireland
- Madagascar
- Mexico
- United States

SGS International, the world's leading inspection, verification, testing and certification company, certifies our Global Forestry Partners and leads field audits across our network of projects to verify 100% net survival of our forests.

Forestry in Ireland

The current native woodland coverage in Ireland stands at a mere 1% of the total surface area. This alarming statistic underscores the urgent need to not only establish new native woodlands for the future but also to connect existing fragments of native or ancient planted woodlands. By creating wildlife corridors, we can enhance biodiversity and enable the free movement of wildlife across these habitats. It has become vitally important to take action in preserving and expanding our native woodlands, ensuring their interconnectedness for the benefit of both wildlife and our natural environment.

FORESTRY PARTNER
NuaTree

With PrintReleaf, you can be part of the solution.
You can also be sure the process is automated,
precise, verified, and will benefit your brand's image.
